2007	14.78	14.23	7.05	1	0%	N/A	N/A			112.2	4.2%

Notes to Performance

- I. Oberweis Asset Management, Inc. (OAM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. OAM has been independently verified for the periods January 1, 1993 through December 31, 2016.

Verification assesses whether (1) the firm has complied with the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Concentrated Small-Cap Growth Composite has been examined for the periods May 1, 2002 through December 31, 2016. The verification and performance examination reports are available upon request.
- II. OAM is an independent investment management firm registered under the Investment Advisor Act of 1940, founded in 1989, that invests in high growth companies around the world. The firm specializes in Small and Mid-Capitalization growth strategies globally for institutional investors and its own proprietary mutual fund family. Registration does not imply a certain level of skill or training. Firm assets presented represent all accounts where OAM has been engaged as investment adviser. A complete list and description of firm composites is available upon request.
- III. The following standards describe performance presented herein:
 - A. The Concentrated Small-Cap Growth Composite was created in May 2002. The reporting currency is U.S. Dollar. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
 - B. Gross performance is computed before deducting advisory fees. Generally, the advisory fees is 1.00% of assets under management for institutional accounts and 1.00% - 1.75% of assets under management for bundled fee accounts. Actual fees are used in the net return calculation.
 - C. The composite returns disclosed were derived solely from the performance of a registered open-end investment company for 2007.
 - D. The Concentrated Small-Cap Growth Composite includes all fully discretionary accounts which invest at least 90% of their assets in the securities of U.S. traded companies with a market capitalization between \$100 million and \$2.5 billion at the time of investment. Beginning October 2010, the composite includes accounts managed with similar investment objectives that charge a bundled fee for investment advisory and administrative services. Prior to January 1, 2008, the minimum market value for portfolios to be included in a composite was \$5 million. Effective January 1, 2013 the equity segment was increased to 90% from 70%.
- IV. The standard deviation of portfolio returns has not been presented for the years 2007-2010 as the composite consisted of five or less accounts during these years. For accounts managed all months in the presentation year, the asset-weighted standard deviation of account returns within the composite is presented as a measure of internal dispersion. The three-year annualized ex-post standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The annualized standard deviation is not presented for 2007 through 2010 because it was not required for periods prior to 2011.
- V. Consultants and investors supplied with these performance results are advised to use this data in accordance with guidelines issued by the United States Securities and Exchange Commission. Past performance is no guarantee of future results. The performance presented is inclusive of commissions and transaction costs and assumes reinvestment of any dividends, capital gains, or other earnings. The client's return will be reduced by the advisory fees and other expenses it may incur in the management of its account. The investment advisory fees are described in Part II of the Form ADV. The advisory fee, compounded over a period of years, will have an adverse effect on the value of the client's portfolio.
- VI. The benchmark for this composite is the Russell 2000 Growth Index. The Russell 2000 Growth Index measures the performance of those Russell 2000 companies with higher price-to-book ratios and higher forecasted earnings growth rates. The Russell 2000 Index measures the performance of 2000 companies with small-market capitalizations. This index is unmanaged and is not available for investment. Benchmark returns are not covered by the report of independent verifiers.
