\*As of December 31, 2017. Oberweis Asset Management, Inc. (OAM), the Fund's investment advisor is contractually obligated through April 30, 2019 to reduce its management fees or reimburse OBIOX to the extent that total ordinary operating expenses exceed in any one year 1.60% expressed as a percentage of the Fund's average daily net assets. The annual expense ratio will reflect a blend of both the old and new expense reimbursement arrangements in effect for 2017.

Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate, so that you may have gain or loss when shares are sold. Current performance may be higher or lower than quoted. Visit us online at [oberweisfunds.com](http://oberweisfunds.com) for most recent month-end performance. Before investing, consider the fund's investment objectives, risks, charges, and expenses. To obtain a copy of the prospectus or summary prospectus containing this and other information, please visit our website at [oberweisfunds.com](http://oberweisfunds.com) or call 800-323-6166. Read it carefully before investing. The Oberweis Funds invest in rapidly growing smaller and medium-sized companies that may offer greater return potential. However, these investments often involve greater risks and volatility. Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations. There is no guarantee that the Funds can achieve their objectives.

The MSCI World ex-US Small-Cap Growth Index (Net) is a free float-adjusted market capitalization weighted index that is designed to measure the performance of small cap growth developed markets excluding the UIS, with minimum dividends reinvested net of withholding tax.

The Oberweis Funds are distributed by Oberweis Securities, Inc. Member: FINRA & SIPC.

## The Quarter in Review

During the third quarter, the Oberweis International Opportunities Fund returned -2.82% versus a -1.38% return for the MSCI World ex-USA Small-Cap Growth Index (the “Benchmark”). On a year-to-date basis, the Fund returned -2.67% versus -0.36% for the Benchmark. Although we anticipate year-by-year fluctuations, we believe the Fund’s long-term track record demonstrates an ability to generate significant alpha over a full market cycle.

Much of 2018 has been dominated by uncertainty over global trade as the Trump administration pressed forward with tariffs and demands for revised trade agreements with all major counterparties. Against this uncertain backdrop, market movements seemed to suggest that the U.S. would be the relative winner and the performance delta among global equities has been quite significant. International small-cap growth stocks trailed those in the U.S. by 690 bps in 3Q and 1,608 bps for the first nine months of 2018<sup>1</sup>, generally attributable to stronger U.S. economic growth, an appreciating U.S. dollar, and rising U.S. interest rates.

Within international markets, Japanese large-caps performed well, gaining 3.77% (as measured by the MSCI Japan Index), but Japanese small-caps lagged their larger brethren by 381 bps for the quarter<sup>2</sup>. Within our small-cap growth benchmark, Japanese small-cap growth stocks returned -1.41% for the quarter and Japan represented our largest country detractor. In the U.K. and throughout much of the European Union, politics also weighed on stock prices as both the MSCI United Kingdom Small Cap Growth and the MSCI Europe Small Growth indices slightly underperformed relative to the Benchmark<sup>3</sup>. The market seemingly feared the EU’s reaction to a budget proposal from the new populist Italian government and the prospect of another Brexit vote. Despite the political uncertainty, the U.K. was our most positive contributing country, driven by positive stock selection.

While developed markets showed little sign of strain, emerging markets felt significant pain. Trade uncertainty, higher oil prices, and rising U.S. interest rates formed a headwind trifecta for emerging markets, especially China. In the third quarter, the MSCI Emerging Markets Small Cap Growth index significantly underperformed both developed markets and U.S. small cap growth stocks. The big question is whether the turmoil felt in emerging markets will spread to the developed world. In the third quarter, that did not happen, although volatility has already moved higher in the first week of October.

## Outlook

After a strong year-to-date outperformance by U.S. equities, developed world equities outside the U.S. appear to be under-owned. While economic activity has been better in the States, research firm IIF found that U.S. equities are approximately 8% over-allocated compared to historical averages. As a result, overseas equities may be underestimated and offer opportunity if earnings growth can continue.

However, we are not yet out of the woods as it relates to uncertainty regarding trade and tariffs, and we are starting to see trade uncertainties impacting company financials. Although we are early in the fourth quarter, a number of global companies have complained about higher input costs and/or somewhat softer pockets of demand due to the fallout from tariffs. As a result, we continue to be somewhat cautious on economically sensitive areas like industrials and metals. Healthcare has been a relative winner so far this year as this sector remains most insulated from trade. Our underweight to healthcare has therefore hurt our performance, but we believe valuations have been and continue to look relatively expensive to us. We remain underweight as we enter the fourth quarter.

The last time we witnessed such an outperformance of U.S. equities relative to the rest of the developed world was during 2014. Today feels similar as there was much to worry about back then as well: Europe was struggling to see earnings improvement after the global financial crisis, while economic and earnings growth in the U.S. was far stronger. During the subsequent twelve months, however, we saw stronger returns for international small cap growth stocks as investors ultimately sought value in under-owned equities overseas. Such a set-up may be in the cards if a positive resolution on trade can be reached. While we are unable to predict how the trade dilemma will unfold, it remains clear that a positive resolution remains in everyone’s best interests.

<sup>1</sup> Benchmark versus Russell 2000 Growth. The Russell 2000 Growth Index returned 5.52% in 3Q and 15.76% YTD.

<sup>2</sup> The MSCI Japan Index returned 3.77% versus -0.04% for the MSCI Japan Small Cap Index

<sup>3</sup> The MSCI United Kingdom Small Cap Growth Index returned -2.23% and the MSCI Europe Small Cap Growth Index returned -1.86%

## Fund Highlights

At quarter-end, the Fund was invested in 89 stocks in 16 countries. Our top five country weightings (portfolio weighting versus the MSCI World ex-USA Small Cap Growth Index) at the end of the quarter were Japan (23.1% vs. 27.9%), the United Kingdom (14.6% vs. 16.4%), Australia (9.2% vs. 6.3%), Canada (8.3% vs. 8.8%) and Germany (6.7% vs. 5.9%). On a sector basis, the Fund is overweight information technology (23.0% vs. 14.9%) and underweight consumer discretionary (9.4% vs. 15.9%).

### COUNTRY ALLOCATION (As of September 30, 2018)

	Oberweis International Opportunities Fund (OBIOX)	MSCI World ex-US Small-Cap Growth Index
Japan	23.1%	27.9%
United Kingdom	14.6%	16.4%
Australia	9.2%	6.3%
Canada	8.3%	8.8%
Germany	6.7%	5.9%
Sweden	6.2%	5.8%
China	6.0%	0.0%
France	5.2%	4.0%
Denmark	4.8%	2.4%
Netherlands	2.8%	2.2%
Switzerland	2.6%	4.7%
Italy	0.0%	2.9%
Spain	1.1%	2.0%
Other Countries	5.0%	10.7%
Cash	4.4%	N/A
Total:	100.0%	100.0%

\*Country Allocation is defined using MSCI's Country Classification methodology and represents countries whose allocation in the Strategy or Index is 2% or more. Country allocations representing less than 2% are categorized in "Other Countries". Country Allocation as a Percentage of Total Net Assets.

## Key Benefits

The Oberweis International Opportunities Fund seeks to identify and capitalize on the investment opportunities offered by smaller companies in Europe, the UK, Canada, Asia, Japan, and Latin America. The Fund focuses on identifying less well-known small-cap companies which traditionally receive less coverage than larger companies, consequently providing unique opportunities to unearth hidden values.

The potential key benefits of the International Opportunities Fund are:

- Diversified portfolio of smaller, non-U.S. companies with higher than expected earnings potential
- Combines empirically-proven Behavioral Finance principles with the very best of fundamental bottom-up research
- Access to attractive but lesser-known foreign companies that do not receive significant institutional coverage but possess higher than expected growth potential
- Achieve a more effective asset allocation, and greater long-term diversification of their portfolios through investments in non-U.S. equities
- Invests primarily in developed markets with some exposure to emerging markets
- Potential for significant alpha over a full market cycle

### Minimum Investment: \$1,000 non IRA, \$500 IRA

The Oberweis Funds invest in rapidly growing smaller and medium sized companies which may offer greater return potential. However, these investments often involve greater risks and volatility. Investing in emerging markets involves risks and considerations not present when investing in more-established securities markets. Investing in international/emerging market investment funds should be considered speculative and thus not appropriate for all investors. There is no guarantee that the portfolios can achieve their objectives.

## Oberweis Asset Management, Inc.

Recognized as a leading small-cap stock specialist, Oberweis has been helping institutional investors manage their assets prudently and effectively for many years.
