

Investment Strategy

The Global Opportunities strategy seeks to capitalize on the exceptional growth potential of smaller companies that are often underfollowed or misunderstood by traditional Wall Street research analysts. The strategy invests in companies where our expectations for earnings growth differ from consensus expectations. Global Opportunities invests in both in U.S. and international markets, targeting companies with market capitalizations of less than \$1.5 billion or within the range of companies represented in the MSCI ACWI Small-Cap Index, whichever is greater. Portfolio companies often boast exciting products and/or services, a strong and sustainable competitive position, and the potential for upward revisions in earnings expectations in the future. Our fundamental research process is specifically designed to uncover such opportunities.

Key Benefits

The potential key benefits of the Global Opportunities Fund are:

- Access to one of the least efficient segments of the equity market

Past performance is not necessarily indicative of future results. Performance is historical and includes the reinvestment of dividends and other income. Unusually high returns may not be sustainable. The strategy invests in rapidly growing smaller and medium-sized companies that may offer greater return potential. However, these investments often involve greater risks and volatility. Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations. Advisory fees are disclosed in Part II of Form ADV.

Oberweis Asset Management, Inc. ("OAM") is an independent investment management firm that is not affiliated with any parent organization. The composite returns are comprised of all fully discretionary accounts with a minimum value of \$5 million. Performance results from 1-1-2015 until present were derived solely from the performance of the Oberweis Global Opportunities Fund, a registered, open-end mutual fund, for which OAM serves as investment adviser. Accounts are dollar-weighted within the composite and reported in U.S. dollars.

The MSCI ACWI Small-Cap Index (Net is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of small cap developed markets and emerging markets, with minimum dividends reinvested net of withholding tax. The MSCI ACWI Small-Cap Index began on May 31, 1994.
