INVESTOR CLASS: (OBEMX)

INSTITUTIONAL CLASS: (OIEMX)

Investment Strategy

The Oberweis Emerging Markets Fund invests, under normal circumstances, at least 80% of its net assets (plus the amount of borrowings, if any) in the securities of companies based in emerging markets. This includes securities of companies based in or whose securities are primarily traded on an emerging market exchange. It also includes those that have at least 50% of their assets in or derive at least 50% of the revenues from business activities in emerging market countries. The Fund generally invests in the stocks of small- and medium-sized companies with a market capitalization of less than \$5 billion or within the range of companies in the MSCI Emerging Markets Small-Cap Index, whichever is greater.

Key Benefits

The potential key benefits of the Emerging Markets Fund are:

- Opportunity to capture growth: Emerging markets are estimated to grow 2-3 times faster than developed nations and a rapidly growing middle class is expected to increase spending and consumption
- Diversification - Emerging markets represent almost a quarter of international markets outside of the United States and provide further opportunity to find quality companies
- Potential for higher returns - Emerging markets have outperformed the general global markets in 13 of the last 20 calendar years
- Access to active portfolio management - less efficient markets may create opportunities for active managers
- A long-term, disciplined investment approach - the strategy focuses on high-quality, well-capitalized companies with sustainable competitive advantages and secular growth tailwinds
- All-weather approach to Emerging Markets Small-Cap

Minimum Investment:

Oberweis Emerging Markets Fund Investor Class (OBEMX): \$1,000 non-IRA, \$500 IRA

Oberweis Emerging Markets Fund Institutional Class (OIEMX): \$1.0 million

The Oberweis Funds invest in rapidly growing smaller and medium sized companies which may offer greater return potential. However, these investments often involve greater risks and volatility. Investing in emerging markets involves risks and considerations not present when investing in more-established securities markets. Investing in international/emerging market investment funds should be considered speculative and thus not appropriate for all investors. There is no guarantee that the portfolios can achieve their objectives.
