Investment Strategy

The Oberweis International Opportunities Fund seeks to identify and capitalize on the investment opportunities offered by smaller companies in Europe, the UK, Canada, Asia, Japan, and Latin America. The Fund focuses on identifying less well-known small-cap companies which traditionally receive less coverage than larger companies, consequently providing unique opportunities to unearth hidden values.

Key Benefits

The potential key benefits of the International Opportunities Fund are:

- Diversified portfolio of smaller, non-U.S. companies with higher than expected earnings potential
- Combines empirically-documented Behavioral Finance principles with the very best of fundamental bottom-up research
- Access to attractive but lesser-known foreign companies that do not receive significant institutional coverage but possess higher than expected growth potential
- Achieve a more effective asset allocation, and greater long-term diversification through investments in non-U.S. equities
- Invests primarily in developed markets with some exposure to emerging markets
- Potential for significant alpha over a full market cycle

Minimum Investment: \$1,000 non IRA, \$500 IRA
