The Fund’s past performance is not a good predictor of the Fund’s future performance.

Index returns assume reinvestment of dividends and, unlike the Fund’s returns, do not reflect any fees or expenses. If such fees and expenses were included in the Index returns, the performance would have been lower. Please note that one cannot invest directly in an unmanaged index.

The MSCI EAFE Index is an equity index that captures large and mid-cap representation across 21 developed markets countries around the world, excluding the U.S. and Canada.
