The Fund's past performance is not a good predictor of the Fund's future performance.

The Fund's performance assumes the reinvestment of all dividends and all capital gains. Index returns assume reinvestment of dividends and, unlike the Fund's returns, do not reflect any fees or expenses. If such fees and expenses were included in the Index returns, the performance would have been lower. Please note that one cannot invest directly in an unmanaged index.

The Russell Microcap Growth Index measures the performance of those Russell microcap companies with higher price-to-book ratios and higher forecasted growth values. The Russell Microcap Growth Index is represented by the smallest 1,000 securities in the small cap Russell 2000 Index plus the next 1,000 securities. The Russell Index is unmanaged and is not available for investment. The S&P 500 Index is a broad-based unmanaged index of the 500 leading publicly traded companies in the United States by market capitalization. The S&P 500 Index is widely recognized as representative of the equity market in general, is unmanaged and is not available for investment.
